# ZEYING XU

• Los Angeles, CA | +1 858-267-7260 | zeyingx1175@gmail.com | LinkedIn | Portfolio

## EDUCATION

**University of Southern California, Los Angeles, CA** **09.2024 – 05.2026**
Master of Management Science (Analytics)

**China Agricultural University (CAU), Beijing, China** **09.2019 – 07.2023**
Major: International Economics and Trade
**Honor: Academic Excellence Scholarship 2021, 2022**

**University of California, San Diego, CA** **09.2022 – 03.2023**
Extended Studies Exchange Program

## SKILLS

**Languages:** Chinese (Native), English (Fluent)

### TECHNICAL SKILLS

- **Programming & Data:** Python (Pandas, NumPy), SQL, Snowflake
- **Visualization & BI:** Tableau, Dashboard Development, Data Visualization
- **Analytics:** EDA, Statistical Analysis, Hypothesis Testing, Regression Analysis, Trend Analysis
- **Data Management:** Data Cleaning, Data Validation, ETL
- **Business Tools:** Excel (PivotTables, XLOOKUP/VLOOKUP, Advanced Formulas, Power Query), PowerPoint, SPSS
- **Design & Media:** Adobe Photoshop, Adobe Premiere Pro, Canva

## PROFESSIONAL EXPERIENCE

**Sage – Beijing, China** **09.2022 – Present**
*Marketing Analytics Assistant (Part-time, Remote)*

- Maintained and analyzed long-term performance datasets across multiple business and marketing channels, identifying trends and delivering actionable insights through 45 monthly analytical reports to support strategic planning and business decision-making.
- Conducted annual content performance reviews by categorizing posts into key themes, ranking the top 100 posts by views, and analyzing category-level engagement distribution to identify high-performing content patterns.
- Analyzed content performance and engagement trends across social media channels, translating findings into layout and content recommendations that contributed to a 20% increase in average views per post the following month.
- Built and maintained structured datasets for 1,087 academic journals, standardizing information across sources to improve data consistency, reporting accuracy, and search visibility.
- Conducted competitive analysis across 6 major publishers by evaluating publication volume, readership, and engagement metrics, producing 10 visualizations to benchmark performance and identify competitive trends.
- Processed and analyzed post-event and campaign datasets across 19 webinars, cleaning participant records and applying institution-level filters to support attendance reporting and follow-up analysis.

**Sage – Beijing, China** **06.2022 – 08.2022**
*Marketing Data Analysis Intern*

- Collected and consolidated social media performance data for 76 WeChat posts (28,740 views) and 62 Weibo posts (83,008 views), organizing engagement metrics into Excel datasets for monthly performance tracking.
- Generated monthly reports summarizing content performance and audience engagement, analyzing key metrics such as views, likes, and shares to evaluate campaign effectiveness.
- Processed and categorized webinar registration datasets from 4 online webinars, structuring participant information by topic to support targeted email follow-ups.
- Screened and compiled journal information based on predefined criteria (e.g., location, open-access status), organizing filtered datasets to support research communication initiatives.

## PROJECT EXPERIENCE

**Movie Industry Trend & Revenue Analysis** **04.2026 – 05.2026**
*Python / SQL / Tableau / Statistics / Business Analytics*

- Built profitability and ROI analysis models using Python to evaluate investment performance across movie genres, supporting data-driven recommendations through statistical analysis and interactive Tableau dashboards.
- Gathered and translated business requirements into analytical workflows by integrating SQL, Python, and Tableau, improving data quality and delivering interactive dashboards that supported data-driven business decisions.
- Cleaned and transformed complex datasets through feature engineering and JSON parsing, applying statistical analysis (ANOVA, t-tests, proportion tests) to evaluate market trends and improve data quality for analysis.

**Customer Churn Prediction & Machine Learning Analysis** **11.2025 – 12.2025**
*Python / Scikit-learn / ML / Feature Engineering / Predictive Analytics*

- Built an end-to-end customer churn prediction pipeline on 7,999 training records, performing EDA, missing-value treatment, categorical encoding, feature engineering, and model evaluation on imbalanced customer data.
- Analyzed behavioral, engagement, and service-related churn drivers, identifying customer tenure, product usage, support interactions, and satisfaction as key indicators of customer attrition.
